

# DIP assignment 5

Yash Shah (160050002), Utkarsh Gupta (160050032)

October 2018

## **1    Ans4**

Based on the images we observe that in the case of Ideal Low pass filter we have ringing artifact around the edges in the images which are more intense when  $D$  is smaller. Such effect is absent when we use a Gaussian low pass filter
